```
Write a Program to Remove the Duplicate Items from a
array.
Sample Input:
Enter the number of elements in array:7
Enter element1:10
Enter element2:20
Enter element3:20
Enter element4:30
Enter element5:40
Enter element6:40
Enter element7:50
Sample Output:
Non-duplicate items:
[10, 20, 30, 40, 50]
```

Testcases:

Your Code

```
import java.util.Scanner;
import java.util.LinkedHashSet;
public class Main
{
    public static void main(String[] args
    {
        Scanner sc = new Scanner(System.i
        System.out.println("enter the num
        int n = sc.nextInt();
```

```
        int[] arr = new int[n];
        for(int i =0;i<n;i++)
        {
            arr[i] = sc.nextInt();

        }
        LinkedHashSet<Integer>set = new I
        for(int i =0;i<n;i++)
        {
            set.add(arr[i]);

        }
        System.out.println(set);
    }
}
```

Output

```
enter the number
[10, 20, 30, 40, 50]
```

```
Write a program to convert Decimal number equivalent
to Binary number and octal numbers?
Sample Input:
Decimal Number: 15
Sample Output:
Binary Number = 1111
Octal = 17
```

Testcases:

```
1. 111
2. 15.2
3. 0
4. B12
5. 1A.2
```

Your Code

```
import java.util.Scanner;
public class Main
{
    public static void main(String[] args
    {
        Scanner sc = new Scanner(System.i
        String input = sc.next();
        int decimal = Integer.parseInt(ir
        String binary = Integer.toBinaryS
```

```
        String octal = Integer.toOctalStr
        System.out.println("binary is:" +
        System.out.println("octal is:" +c

    }
}
```

Output

```
binary is:1111
octal is:17
```

```
Write a program to enter the marks of a student in
four subjects. Then calculate the total and
aggregate, display the grade obtained by the
student.
If the student scores an aggregate greater than 75%,
then the grade is Distinction.
If aggregate is 60>= and <75, then the grade is
First Division.
If aggregate is 50 >= and <60, then the grade is
Second Division.
If aggregate is 40>= and <50, then the grade is
Third Division.
Else the grade is Fail.

Sample Input & Output:
Enter the marks in python: 90
Enter the marks in c programming: 91
Enter the marks in Mathematics: 92
Enter the marks in Physics: 93
Total= 366
Aggregate = 91.5
DISTINCTION
```

Testcases:

```
a)      18, 76,93,65
b)      73,78,79,75
c)      98,106,120,95
d)      96,73, -85,95
e)      78,59.8,76,79
```

Your Code

```
import java.util.Scanner;
public class Main
{
    public static void main(String[] args
    {
        Scanner sc = new Scanner(System.i
        int python = sc.nextInt();
        int c = sc.nextInt();
        int maths = sc.nextInt();
        int physics = sc.nextInt();
        int total = c + maths+physics+pyt
        double aggregate = (double) total
        System.out.println("marks in pyth
        System.out.println("marks in c :"
        System.out.println("marks in math
        System.out.println("marks in phys
        System.out.println("total is :" +
        System.out.println("aggregate is:
        if(aggregate> 75)
        {
            System.out.println("DISTINCTI

        }
        else if(aggregate>=60 && aggregat
        {
            System.out.println("FIRST DIV
        }
        else if(aggregate>=50 && aggregat
        {
            System.out.println("SECOND DI
        }
        else if(aggregate>= 40 && aggrega
        {
            System.out.println("THIRD DIV
        }
        else
        {
            System.out.println("FAIL");
        }

```

```
    }
}
```

Output

```
marks in python:90
marks in c :91
marks in maths:92
marks in physics: 93
total is :366
```
